

## Company News:

The first two months of 2021 have been busy for Helium One, as the company moves towards its initial drilling campaign in Q2 of this year, with several pieces of key newsflow announced, including the submission of the Environmental and Social Impact Assessment (ESIA) at the Rukwa Project, the commencement of surface geochemical exploration programme at Eyasi, and the commencement of our Infill Seismic Campaign at Rukwa, with fieldwork underway in alignment with schedule.

CEO, David Minchin, who has moved to Tanzania to oversee field operations, comments: "It is a big start to a big year, which we are hoping will be transformational for the company. With unprecedented levels of support from the government and community, the Company has been able to fast-track our field operations, with on the ground activity continuing as we move into our maiden drilling campaign."

CEO David Minchin meets

Deputy Minister for Minerals, Prof. Shukrani Manyi  
in Dodoma

## Helium in the News:

02.02.2021: [The Helium Market Grows With Its Increased Use In Healthcare](#)

The helium market growth is expected to be driven by the growing demand from the healthcare industry. Helium is widely used in various disease diagnosis equipment as it has unique properties such as being inert in nature, non-reactive with other elements, non-corrosive, and non-flammable. Helium is used in various applications in the healthcare industry such as adjunct therapy in asthma exacerbation, ARDS, croup, COPD, and bronchiolitis.
